Repair
Product Screening*

Expanding possibilities

Special Projects

Aiming to assist our clients in the implementation of solutions, we have a team ready to provide the following services:

- ✓ Labor outsourcing (engineers, buyers, planners, technicians, project managers, etc.)
- ✓ Mapping, analysis and optimization of processes (technical and environmental)
- ✓ Statistical analysis
- ✓ Graphic and mechanical design (packaging, totems, kiosks, etc.)
- ✓ On-site disassembly (reinstatement)
- ✓ VMI (Vendor Management Inventory)

*Smart solutions in
packaging and handling*

Packaging

We offer packaging and kits assembly services with excellent final quality, and with processes specially developed for your products. Our skilled team ensures fast, safe and loss-free service. We provide protection accessories and shims both for the safety of the product in the transport as for packaging process according to the needs of each customer and the specificities of each product.

Shims and protections developed for your specific needs

We provide it according to the needs of each customer and the specificities of each product, protection accessories and shims both for the safety of the product in the transport as for packaging.

AIR-PACK

Protection solution based on small inflatable tubes. Compressed air inside the tubes helps protect during transport.

SHAPED PULP

Following QPRO's commitment to the environment, we provide shims with recycled material, shaped according to the needs of each customer.

EPE - EXPANDED POLYETHYLENE

EPE foam is a fully customizable material that can be produced in various thicknesses, shapes and densities. It is indicated mainly for fragile items, such as electronics, because they require extra protection against impact and temperature variation.

EPS - EXPOSED POLYSTYRENE

EPS is a popular type of rigid cellular plastic that can be produced in various shapes and is also suitable for impact protection and temperature variation.

PACKAGING HUB (VMI - VENDOR MANAGEMENT INVENTORY)

QPRO Packaging Hub converges handling, packaging, assembly line and storage into the same place, resulting in quality, less time and cost savings. For this, QPRO has a complete infrastructure, large and carefully designed spaces and a highly qualified team. QPRO Packaging Hub guarantees the following benefits for your business:

- ✓ Prevents acquisition of new spaces for storage;
- ✓ Freeing internal spaces for operations related to the customer's core business;
- ✓ One supplier only being responsible for various processes, improving administrative efficiency;
- ✓ More security for your inventory;
- ✓ Integrated logistics process, ensuring more agility.

PRODUCTION OF PROTECTION SHIMS

QPRO produces, according to the needs of each customer and the specificities of each product, protection accessories and shims for both transport safety and packaging.

SCREENING

We will also offer the verification of products or parts service, following the technical instructions of the customers.

ASSEMBLY OF KITS AND SUBASSEMBLIES

We are equipped to provide assembly of kits and subassemblies services.

*Know the guidelines for
QPRO business responsibility*

Integrated Management System

For the provision of Environmental Management, Reverse Logistics and Outsourcing services at national level, we defined the following Integrated Management System Policy:

1

To ensure Customer Satisfaction by adequate service, quality of services and commitment to meet the established deadlines;

2

To preserve the environment through the establishment of goals;

3

Commitment to the Continuous Improvement of the Integrated Management System and meeting the Goals established;

4

To comply with all the laws and applicable environmental standards;

5

To promote education actions and training of all the employees.
